The background of the entire page is a light gray surface covered with numerous small, realistic water droplets of varying sizes. Overlaid on this are several thin, dark gray lines that intersect to form a series of large, irregular geometric shapes, resembling a stylized architectural or crystalline structure.

WARM

HAMMAM

L'hammam, nato nell'ambito della cultura araba per permettere ai fedeli di assolvere alle abluzioni rituali, si è successivamente diffuso in tutto il mondo occidentale come strumento di benessere, grazie alle proprietà benefiche che gli vengono universalmente riconosciute.

Fra i benefici derivanti dalla pratica del bagno di vapore si possono citare il rilassamento muscolare, il miglioramento della circolazione sanguigna, la cura dei reumatismi, l'eliminazione delle tossine tramite la sudorazione e la decongestione delle vie respiratorie.

The hammam was used originally in the Arab culture to allow believers to perform their ritual ablutions. It then spread throughout the whole Western world as a wellness element, thanks to its universally recognized beneficial properties.

Among the benefits of the steam bath practice there are muscle relaxation, improved blood circulation, rheumatism cure, toxins elimination through perspiration and decongestion of the airways.

Le hammam est né dans le contexte de la culture arabe pour permettre aux fidèles d'accomplir les ablutions rituelles; il s'est ensuite répandu dans le monde occidental comme un outil de bien-être, grâce aux propriétés bénéfiques qui le sont universellement reconnus.

Parmi les avantages de la pratique du bain de vapeur on peut citer la relaxation musculaire, l'amélioration de la circulation sanguine, le remède contre les rhumatismes, l'élimination des toxines par la transpiration et la décongestion des voies respiratoires.

Das Hammam wurde in der arabischen Kultur ursprünglich von den Gläubigen verwendet um deren rituellen Waschungen durchzuführen. Es breitete sich dann in der gesamten westlichen Welt als Wellness-Element aus, dies insbesondere dank den allgemein anerkannten positiven Auswirkungen auf die menschliche Gesundheit.

Vorteile der Praxis des Dampfbades sind u.A. Muskelentspannung, Verbesserung der Durchblutung, Rheumaheilen, Beseitigung der Toxine durch Schwitzen und Abschwellen der Atemwege.
